

Activate – SharePoint Workflow transformation to Power Automate

Proof of Concept

Duration: 2 Days

Focus Area: Upgrade, Migration and Deployment

Overview

Targeted towards Business and IT audience, Workflow assessment (SharePoint 2010 Workflows in SharePoint Online) and migration guidance to Power Automate is a discovery and hands on learning event that provides information about the presence of SharePoint 2010 Workflows in the SharePoint Online tenant. This IP also provides knowledge transfer on migration guidance to Power Automate.

The delivery comprises of the following activities

- SharePoint 2010 Workflows discovery
- Workflows Vs Power Automate comparison training
- Hackathon – Transforming a SharePoint Designer SharePoint 2010 Workflow to Power Automate flow.

Objectives

By attending this delivery, participants will be able to

- Understand the footprint of SharePoint 2010 Workflows in the environment.
- Learn the features and functionality differences between Workflows and Power Automate.
- Migrate a sample SharePoint Designer SharePoint 2010 Workflow to Power Automate flow (manual conversion)
- Migrate an SharePoint 2010 Workflow from target environment to Power Automate (manual conversion) as a PoC.

Methodology

Learn by example

Learn key concepts and migration guidance as you work side-by-side with a Premier Field Engineer to enable a starting point for transforming your business processes by migrating from legacy SharePoint 2010 Workflow service to modern Power Automate technology.

Build a Proof-of-Concept

Gain hands-on experience in a Proof-of-Concept scenario that demonstrates how to:

- Transform existing legacy SharePoint 2010 Workflows leveraging Power Automate.

Key Takeaways

This event helps gaining knowledge on the successor (Power Automate flows) to SharePoint Workflows by focusing on,

- Discussing like to like features
- Discussing the alternatives where corresponding Workflow features/functionality does not exist in Power Automate flows
- Exploring Power Automate flows technology
- Driving business Innovation
- Encouraging empowered teams
- Increase in Productivity

Agenda

Pre-delivery:

- Run automated SharePoint 2010 Workflow discovery against the target SharePoint Online environment.

Day 1:

- Understand the feature/functionality difference and comparison between Workflows and Power Automate flows.
- Converting a sample SharePoint Designer SharePoint 2010 Workflow to Power Automate flow.

Day 2:

- Transform – Transform a SharePoint 2010 Workflow from your environment to Power Automate flow via Hackathon.

Scope Call outs

- The assessment is targeted towards SharePoint Online environment only.
- The scope of this IP is limited to business processes that are using SharePoint 2010 Workflow service
- The assessment can be run against any one of the target environment.
- For Day-2 Hackathon, we strongly recommend the focus area confined to **one** Workflow conversion for all the participants

Target audience

- This Hackathon is intended for Business Users and IT Pros who currently work with Microsoft 365 Apps/Services.
- There is no Power Automate training that is provided as part of this delivery. We strongly recommend that the participants have prior knowledge on Power Automate technology.

Pre-requisites/Logistics

- Participants are expected to have basic knowledge on the Microsoft 365 technologies that are used to develop the solution during Hackathon.
- The maximum number participants allowed for this event are 12.

Hackathon Lab Requirements

- Microsoft 365 trial tenant will be leveraged during the Hackathon.
- Participants need to have SharePoint Designer software installed on their machines
